

Agile Sprinter Workshop

Moss and Lichens

Time: 3 days, 4 hours per day

Day 1

Introduction, Expectations,
User Story Mapping, Scrum Theory,
Agile with existing People and IT

Day 2

Scrum Team Formation with Role and
Responsibilities for Developers,
Product Owner and Scrum Master

Day 3

Scrum Process Kickoff with Daily and
What & How Planning

Workshop Moderator: Ranjith Venkatesh

As your workshop moderator Ranjith uses Liberating Structures to understand your current processes, people and knowledge. He explains Scrum (using Kanban) theory in an understandable and usable manner. Together with you, he drafts ideas to introduce Agile frameworks that suit the company and the challenges at hand.

Ranjith was a full stack Microsoft Developer from 2002 to 2015 and understands the importance of Agile development practices combined with DevOps.

He has been a Scrum Master and Agile Coach since 2015 working with different teams in the Strategy Consulting, Optics, Automobile and Tools industries.

Ranjith runs a regular "Scrum Speakers" meetup in Munich - physically or online to bring together Scrum practitioners to share their stories, play Agile games and debate on Agile implementation topics.

Testimonials:

"The seminar on User Story Mapping helped us to understand and organize the innumerable tasks we are juggling each week. That was an enlightening process. But the Kanban seminar has been even more helpful. It has enabled us to work on tasks more efficiently, focus on priorities, communicate about task-management more quickly and easily and keep the progress of all of the processes organized in such a way that we can all see at an instant where we are in each process and what needs attention. I highly recommend both seminars for anyone who is interested in improving the efficiency, communication or organization within their team!"

- Kristy Koth, Geschäftsführerin bei Edition bilibri

"In my current project I had a pleasure to work with Ranjith. With his professionalism, positive perspective, his confidence as well as his in-depth technology knowledge Ranjith is a big win for each team. I can highly recommend Ranjith as Scrum Master and Agile Developer."

- Damir Abdic, Strategy Consultant, Agile Coach at basiccircle.com

"His observations are precise and delivered mindfully with valuable suggestions for improvement - a true gift! He also trains and shares his insights. Should he lead an international contest (rather than compete in it), he upholds highest standards and seemingly effortless focuses all participants while being an entertaining host. I highly recommend experiencing "the Ranjith-Factor" at the next opportunity!"

- Karla Viebahn, HR & People Expertise in German & English

"As Product Owner of the Scrum Team (blue team), it was a pleasure to work with Ranjith. Ranjith was able to understand really quickly complex workflows. He had always good ideas to improve our processes."

- Christophe Décombe, Product Owner by Kratzer Automation AG
